1 Networked appliances in home entertainment

Madjid Merabti

December 2006 Proceedings of the 2006 international conference on Game research and development CyberGames '06

Publisher: Murdoch University

Full text available: pdf(577.30 KB) Additional Information: full citation, abstract, references, index terms

In recent years, advances in multimedia applications, services and intelligent networked appliances have been making ubiquitous home environments a reality. As broadband becomes part of our household infrastructure, in the same way we receive water, gas and electricity, it is envisaged that every device will have a network interface that allows it to be accessed and controlled from anywhere in the world. This idea is generating a great deal of interest where sound business models are being de ...

**Keywords:** dynamic service composition, home networking, interoperability, multimedia services, networked appliances, service descriptions, ubiquitous computing

2 Service applications: Implementing integrated services of networked home appliances using service oriented architecture

Masahide Nakamura, Hiroshi Igaki, Haruaki Tamada, Ken-ichi Matsumoto

November 2004 Proceedings of the 2nd international conference on Service oriented computing ICSOC '04

Publisher: ACM Press

Full text available: pdf(2.34 MB) Additional Information: full citation, abstract, references, index terms

This paper presents a method to implement integrated services of networked home electric appliances, which provide more convenient and comfortable living for home users. The conventional methods generally employ a home server to achieve the integrated services. The server controls all the networked appliances in a centralized manner. However, as the number of sophisticated appliances increases, the centralized server suffers from the concentration of load, as well as a decline in the reliabil ...

**Keywords:** home network system, implementation, reliability, service oriented architecture

3 PACT 2001 workshops: A middleware component supporting flexible user interaction for networked home appliances

Tatsuo Nakajima

December 2001 ACM SIGARCH Computer Architecture News, Volume 29 Issue 5

Publisher: ACM Press

Full text available:  [pdf\(768.83 KB\)](#) Additional Information: [full citation](#), [abstract](#), [references](#), [citations](#), [index terms](#)

In this paper, we describe a middleware component supporting flexible user interaction for networked home appliances, which is a simple mechanism to fill the gap between traditional user interface systems and advanced user interaction devices. Our system enables us to control appliances in a uniform way at any places, and the system allows us to select suitable input and output devices according to our preferences and situations. Our system has based on the stateless thin-client system, and tran ...

4 Session 14: middleware support for multimedia: A pluggable service-to-service communication mechanism for home multimedia networks

Jin Nakazawa, Hideyuki Tokuda

December 2002 **Proceedings of the tenth ACM international conference on Multimedia MULTIMEDIA '02**

**Publisher:** ACM Press

Full text available:  [pdf\(436.61 KB\)](#) Additional Information: [full citation](#), [abstract](#), [references](#)

This paper proposes a pluggable service-to-service (S2S) communication mechanism in a middleware for home networks, called Virtual Networked Appliance (VNA) architecture. In the architecture, service description method and the plug-gable S2S communication mechanism are separated in an orthogonal way. Through the separation, VNA architecture solved problems of home networks on which users have to operate multiple heterogeneous middleware technologies simultaneously: middleware fragmentation probl ...

5 Design & Usability Session Papers: A user-centered approach to designing home network interfaces

Kook Hyun Chung, Kyoung Soon Oh, Cheong Hyun Lee, Jae Hyun Park, Sunae Kim, Soon Hee Kim, Beth Loring, Chris Hass

April 2003 **CHI '03 extended abstracts on Human factors in computing systems CHI '03**

**Publisher:** ACM Press

Full text available:  [pdf\(140.57 KB\)](#) Additional Information: [full citation](#), [abstract](#), [citations](#), [index terms](#)

This case study describes our approach to enhancing the way family members may interact with each other - and their homes - in the near future. Samsung Electronics and American Institutes for Research worked together to show how the user-centered design of network technology in the home could best enhance a family's ability to communicate, play, and live harmoniously. We conducted user research in South Korea and in the U.S., held fast-paced collaborative design sessions, and created interactio ...

**Keywords:** auditory user interface, consumer products, graphical user interface, home networked appliances, international design, smart homes, user research, web

6 Home spirituality: Home networking and HCI: what hath god wrought?

Erika Shehan, W. Keith Edwards

April 2007 **Proceedings of the SIGCHI conference on Human factors in computing systems CHI '07**

**Publisher:** ACM Press

Full text available:  [pdf\(403.91 KB\)](#) Additional Information: [full citation](#), [abstract](#), [references](#), [index terms](#)

For much of the industrialized world, network connectivity in the home is commonplace. Despite the large number of networked homes, even the most technically savvy people can have difficulties with home network installation and maintenance. We contend that these problems will not disappear over time as the networking industry matures, but rather are due to structural usability flaws inherent in the design of existing network infrastructure, devices, and protocols. The HCI community can offer ...

**Keywords:** computer networking, home computing, home networking, infrastructure,

troubleshooting, ubiquitous computing

7 Wireless home networks: A review on wireless home network technologies

K. Vaxevanakis, Th. Zahariadis, N. Vogiatzis

April 2003 **ACM SIGMOBILE Mobile Computing and Communications Review**, Volume 7 Issue 2

**Publisher:** ACM Press

Full text available: pdf(1.63 MB) Additional Information: [full citation](#), [abstract](#), [references](#), [citations](#)

Connecting residences to broadband access networks offers an unprecedented opportunity to extend the networking customer base beyond the satiated corporate environment. Yet despite this promising prospect, the market is evolving very tenuously: on one hand, there are numerous industrial consortia and standardization bodies that continue their work on independent and often non-interoperable specifications for residential networks; on the other hand, while there are multiple home PCs and multimedi ...

8 DiamondHelp: a new interaction design for networked home appliances

Charles Rich, Candace Sidner, Neal Lesh, Andrew Garland, Shane Booth, Markus Chimani  
January 2006 **Personal and Ubiquitous Computing**, Volume 10 Issue 2-3

**Publisher:** Springer-Verlag

Full text available: pdf(303.17 KB) Additional Information: [full citation](#), [abstract](#)

Ordinary people already have great difficulty using the advanced features of digitally enhanced household products, and the problem is getting worse as more features are continually being added. This usability problem cannot be solved using only the tiny displays and limited control buttons typically found on home appliances. By using a home network to share a larger and more powerful display, we can provide a new type of collaborative interface in which the product actively helps the user, espe ...

10 Putting it together: the home area network

Win Treese

March 2000 **netWorker**, Volume 4 Issue 1

**Publisher:** ACM Press

Full text available: pdf(265.67 KB) Additional Information: [full citation](#), [index terms](#)  
 html(12.10 KB)

11 InfoPoint: A Device that Provides a Uniform User Interface to Allow Appliances to Work Together over a Network

Naohiko Kohtake, Jun Rekimoto, Yuichiro Anzai

January 2001 **Personal and Ubiquitous Computing**, Volume 5 Issue 4

**Publisher:** Springer-Verlag

Full text available: pdf(563.67 KB) Additional Information: [full citation](#), [abstract](#), [citations](#), [index terms](#)

This paper proposes a new hand-held device called "InfoPoint" that allows appliances to

work together over a network. We have applied the idea of "drag-and-drop" operation as provided in the GUIs of PC and workstation desktop environment. InfoPoint provides a unified interface that gives different types of appliances "drag-and-drop"-like behaviour for the transfer of data. Moreover, it can transfer data from/to non-appliances such as pieces of paper. As a resu ...

12 A software infrastructure for supporting spontaneous and personalized interaction in home computing environments

Tatsuo Nakajima, Ichiro Satoh

September 2006 **Personal and Ubiquitous Computing**, Volume 10 Issue 6

**Publisher:** Springer-Verlag

Full text available:  [pdf\(459.60 KB\)](#) Additional Information: [full citation](#), [abstract](#)

Our daily lives are expected to change dramatically due to the popularity of ubiquitous computing technologies. These will make it possible to integrate various aspects of our lives. However, a new approach is required to seamlessly deal with devices embedded in our environments. Future embedded systems will embody a new approach that will take into account a variety of new issues, for example, spontaneous interaction, personalization, privacy protection, and interoperability. In this paper, we ...

**Keywords:** Appliance coordination, Home computing, Personal devices, Personalization, Spontaneous interaction

13 Pervasive Servers: A framework for creating a society of appliances

Tatsuo Nakajima

July 2003 **Personal and Ubiquitous Computing**, Volume 7 Issue 3-4

**Publisher:** Springer-Verlag

Full text available:  [pdf\(352.36 KB\)](#) Additional Information: [full citation](#), [abstract](#), [index terms](#)

The paper proposes a framework to support spontaneous interaction among information appliances in our daily computing environments by creating a society of appliances. Our framework, that we call Pervasive Servers, embeds micro-servers called stationary pervasive servers everywhere. Also, a personal pervasive server that is carried by each person coordinates the embedded servers that are near to the person. The framework is very attractive because it is easy to personalise the coordination accor ...

**Keywords:** Appliances, Software infrastructure, Spontaneous interaction

14 Wireless home networks: Introduction to the special feature on wireless home networks

Theodore B. Zahariadis, Apostolis K. Salkintzis

April 2003 **ACM SIGMOBILE Mobile Computing and Communications Review**, Volume 7 Issue 2

**Publisher:** ACM Press

Full text available:  [pdf\(246.58 KB\)](#) Additional Information: [full citation](#), [references](#)

15 Linley on Linux: Home Network Push Accelerates

Linley Gwennap

January 2001 **Linux Journal**

**Publisher:** Specialized Systems Consultants, Inc.

Full text available:  [html\(7.34 KB\)](#) Additional Information: [full citation](#), [index terms](#)

16 Wireless home networks: Design and implementation of the HiperLan/2 protocol

E. P. Vasilakopoulou, G. E. Karastergios, G. D. Papadopoulos

April 2003 **ACM SIGMOBILE Mobile Computing and Communications Review**, Volume 7  
Issue 2

**Publisher:** ACM Press

Full text available:  pdf(1.50 MB) Additional Information: [full citation](#), [abstract](#), [references](#)

In recent years, wireless communication systems have experienced an enormous development, leading to the emergence of various wireless networks standards. These standards are characterized by different properties, such as their coverage, data rates, mobility and QoS support. Among them the HiperLan/2 standard is distinguished of its performance, supporting the provision of high-speed integrated services. Its centralized Medium Access Control protocol though is the most critical and complex funct ...

17 User interfaces and UI design: Location-dependent information appliances for the home

Kathryn Elliot, Mark Watson, Carman Neustaedter, Saul Greenberg  
May 2007 **Proceedings of Graphics Interface 2007 GI '07**

**Publisher:** ACM Press

Full text available:  pdf(2.00 MB) Additional Information: [full citation](#), [abstract](#), [references](#), [index terms](#)

Ethnographic studies of the home revealed the fundamental roles that physical *locations* and *context* play in how household members understand and manage conventional information. Yet we also know that digital information is becoming increasingly important to households. The problem is that this digital information is almost always tied to traditional computer displays, which inhibits its incorporation into household routines. Our solution, *location-dependent information applia* ...

**Keywords:** *ambient displays, case studies, domestic technology, location-based design, tangible interfaces, ubiquitous computing*

18 The information furnace: consolidated home control

Dionmidis D. Spinellis  
May 2003 **Personal and Ubiquitous Computing**, Volume 7 Issue 1

**Publisher:** Springer-Verlag

Full text available:  pdf(488.36 KB) Additional Information: [full citation](#), [abstract](#), [citations](#), [index terms](#)

The Information Furnace is a basement-installed PC-type device that integrates existing consumer home-control, infotainment, security and communication technologies to transparently provide accessible and value-added services. A modern home contains a large number of sophisticated devices and technologies. Access to these devices is currently provided through a wide variety of disparate interfaces. As a result, end users face a bewildering array of confusing user-interfaces, access modes a ...

19 Power line communication network trial and management in Korea

Jae-Jo Lee, Choong Seon Hong, Joon-Myung Kang, James Won-Ki Hong  
November 2006 **International Journal of Network Management**, Volume 16 Issue 6

**Publisher:** John Wiley & Sons, Inc.

Full text available:  pdf(1.33 MB) Additional Information: [full citation](#), [abstract](#), [references](#), [index terms](#)

Power line communication (PLC) has become an important network access technology to conveniently and effectively provide various useful services such as remote meter reading, broadband Internet access, and home networking services. As the deployment and use of PLC networks increase, it is essential that we need to be able to configure, monitor, and control the PLC network resources. In this paper, we present an overview of PLC network technology and describe a trial PLC network and its deploymen ...

Application requirements for middleware for mobile and pervasive systems

Kimmo Raatikainen, Henrik Bærbak Christensen, Tatsuo Nakajima

October 2002 **ACM SIGMOBILE Mobile Computing and Communications Review**, Volume 6 Issue 4

**Publisher:** ACM Press

Full text available: pdf(111.22 KB)

Additional Information: [full citation](#), [abstract](#), [references](#), [citations](#), [index terms](#)

In this paper, we examine the requirements for future middleware to support mobile and pervasive applications and identify key research areas. We illustrate the research areas with requirements identified in two specific research projects concerning pervasive healthcare and home entertainment.
